## Professional Summary

---

Frontend Developer with hands-on experience specializing in building high-performance, user-centric web applications. Proficient in the modern stack, including React.js, Next.js, and TypeScript. Proven ability to deliver scalable solutions within Agile environments, focusing on responsive design, cross-browser compatibility, and overall web performance.

## Experience

---

### Frontend Developer Trainee → Frontend Developer

Next Gen Tech Services, Indore | Aug 2025 – Present

- Built a real-time travel booking interface with dynamic package customization (itinerary, hotels, activities).
- Architected scalable, reusable component systems for complex UI flows (dashboards, chat interfaces).
- Developed a modular chat-based UI system (Q&A, case search, document review) with real-time messaging, threads, and persistent history.
- Implemented file upload and document interaction flows for review systems.
- Integrated REST APIs using Axios for dynamic data-driven rendering.
- Implemented client-side routing with React Router for seamless multi-module navigation.
- Enhanced UX with loading states, typing indicators, and robust error handling.

## Projects

---

### Travel Booking Platform

- Developed a responsive **B2B** travel booking platform for Agencies and Agents with **role-based** access and **authentication**.
- Built complete package **booking workflow**, including traveler details, room selection, date selection, dynamic pricing, coupon application, and secure online **payment integration**.
- Developed itinerary management, **hotel booking**, **sightseeing**, and transfer modules for end-to-end travel planning.
- Optimized user experience with responsive design, **API-driven data rendering**, and scalable component architecture.

### AI-Powered Legal Research Platform

- Developed a web application for **AI-powered legal** research, case search, and document analysis.
- Built a real-time AI chat interface with chat history, **threaded conversations**, and workspace management.
- Implemented case search and **document upload/review** workflows for efficient legal research.
- Integrated **REST APIs** and developed reusable, responsive UI components using React.js and Tailwind CSS.
- Enhanced user experience with loading states, **typing indicators**, and robust error handling.

### HireHub ( Recruiting Platform)

- Develop a centralized platform to streamline the recruitment process for organizations
- Enable efficient management of job postings, candidate applications, and hiring workflows
- Implemented user authentication, job workflows, and email notifications (SendGrid)

Skills

---

**Languages:** HTML5, CSS3, JavaScript (ES6+), TypeScript  
**Frontend:** React.js, Next.js, Vite, Tailwind CSS, Bootstrap, Redux  
**Database:** MongoDB, MySQL (Basic)  
**Tools:** Git, GitHub, Postman, Vercel, VS Code
